Page 181 GCE Biology (New Specification) Classification Code has the same Classification Code as
GCE Human Biology (New Specification) hence the paragraph listed below has been added

The specifications for Biology and Human Biology both have the same classification code of 1010. This means that these specifications assess a common subject area and should be seen as alternative specifications.

If a candidate chooses to enter for more than one GCE AS/A level qualification with the same classification code, only one grade (the highest) will be counted for the purpose of the School and College Performance Tables. Candidates should also note that universities and employers are very likely to react in a similar way and only accept one of the two results.
