

Examination of Long Answers

Information for teachers and candidates about changes to our question paper style and how our examiners will mark long answers on screen

v1.1

Executive summary

What's this booklet about?

This booklet provides you and your candidates with all the information you need to know about changes, from June 2010, to examinations with separate question papers and answer books. There will be:

- a new numbering system using two digits
- a new style of answer book with spaces for candidates to write the two digit question numbers.

What's this booklet for?

This booklet gives detailed guidance for teachers and Examinations Officers about the changes we are making to question papers for June 2010. It is designed to allow teachers to fully prepare candidates for the changes and to ensure that candidates are confident about what is expected, and what will be required, of them in the examinations which are changing.

Who's this booklet for?

This booklet is for teachers, their candidates, Examinations Officers and Examinations Invigilators.

What's next?

We are producing specimen papers, based on the June 2009 examinations, for those components / units affected by the new numbering system. These will be available for download from the relevant AQA subject web pages from the middle of January 2010. This will enable you to see the changes in action and to share them with candidates in preparation for the examinations in June 2010.

For more information

For more information on these changes, please contact your subject team (contact details can be found on AQA's web site aqa.org.uk).

New examination technology for marking long answers on screen

The pilots, results and benefits for you and your candidates

Introduction

We use technology only where we are certain that it:

- provides improvements
- does not adversely affect the quality of our assessments and their evidence of candidates' attainments.

We take a great deal of care to ensure that our developments are supported by rigorous research and deliver what you and your candidates want and need.

This update tells you all that you need to know about the marking of long answers on screen and how our work in this area may affect you and your candidates in June 2010.

Background

In June 2009, our examiners marked 2.6 million scripts on screen. We have generally restricted our use of scanned electronic images to the assessment of short or structured answers. Until June 2009, we did not ask our examiners to mark long answers, such as essays, using new software technology.

Pilots

However, in June 2009, we piloted new software which was designed to enable our examiners to mark longer answers on screen. Two subjects were involved in this pilot: GCE Classical Civilisation and GCSE History. Both subjects also piloted the use of a new style answer book.

The pilots were successful and demonstrated that the new technology developed for AQA:

- can accommodate question choice and the variable length of written responses from candidates
- does not disadvantage candidates.

In November 2009, we are conducting further pilots of the new numbering system and new style answer books in GCSE English A Papers 1F and 1H. We will look carefully at candidates' experiences in these examinations and ensure that any necessary adjustments are made to our assessments in order to support candidates.

The pilots have highlighted the following benefits of us using this new technology in examinations:

The new technology....

- supports greater accuracy of marking and quality control, enabling us to:
 - monitor the accuracy and consistency of our examiners' assessments throughout the whole of the marking period, rather than at strategic stages in the process
 - give our examiners regular feedback on their assessments, thereby leading to even more accurate and consistent marking
- helps us to publish results on time
- enables us to collect candidates' marks for individual questions and to offer centres instant Enhanced Results Analysis (ERA), providing detailed analyses of both candidates' and centres' performance in examinations. (See **Appendix A** for further information on ERA and how to make use of this free service.)
- enables centres to access fully annotated scripts (via the Access to Scripts service), so that teachers can see how and where marks have been allocated, and feed this knowledge and information into their delivery of the specification
- enables us to process scripts more quickly and efficiently as a result of a reduction in the number of times that each script is posted. Traditionally, scripts were sent between centre and examiner, between examiner and senior examiner and between the senior examiner and AQA. Now, centres send scripts direct to our scanning bureau, who release electronic images to examiners. This reduces further the risk of scripts being delayed or going missing
- strengthens the standardising process by enabling examiners to focus on marking a single question at a time, applying the mark scheme to their allocation of this question with even greater accuracy and consistency, rather than digesting the full mark scheme and applying it to whole scripts
- enables us to total marks awarded automatically, thereby removing any potential for errors in addition
- helps us to ensure that important decisions about grade boundaries are supported by the maximum amount of statistical information available
- enables us to receive improved post examination data analysis. For senior examiners this means that they can see at a glance exactly how individual questions have scored so that they can evaluate how each question type has worked, where candidates have had problems, vocabulary that may have caused difficulty, etc.

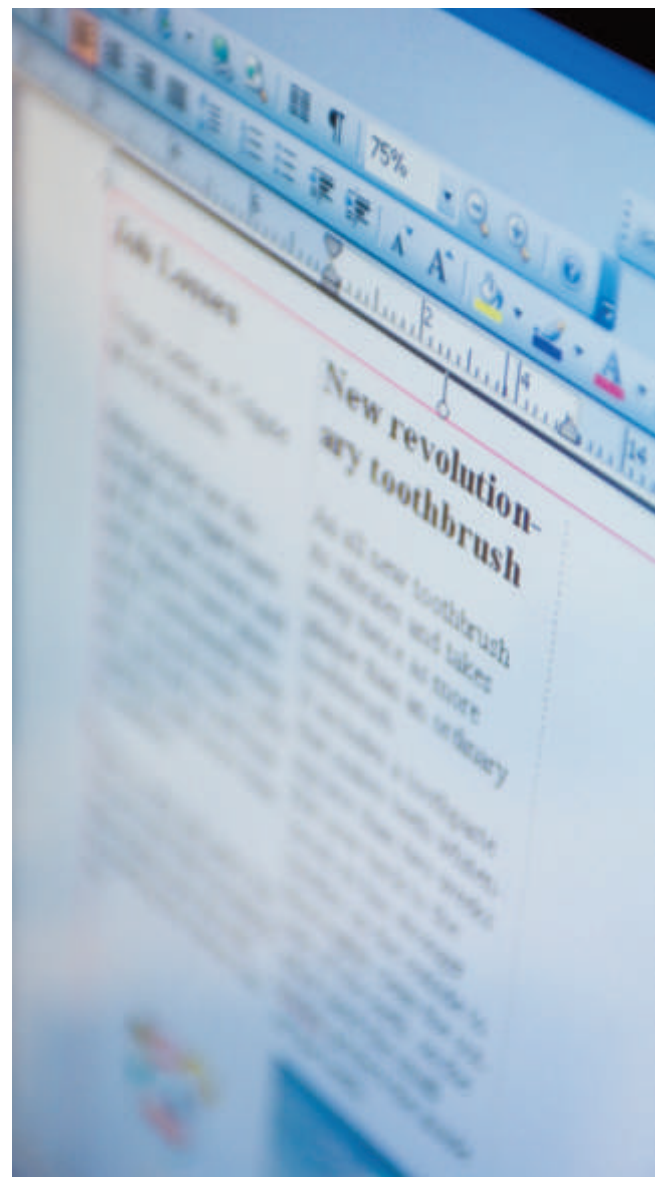

How will our question papers change?

From June 2010, **all** of our question papers will:

- be typeset in Arial font, thereby improving accessibility to all candidates
- require candidates to write in black ink or black ball point pen. Blue pens are not acceptable. This is to ensure that scanning is as good as it can be, so that all examiners can access and reward appropriately candidates' answers.

For examinations with separate question papers and answer books, there will be:

- a new, simplified, numbering system using two-digits
- a new style of answer book with spaces for candidates to write the two-digit question numbers.

The new numbering system is illustrated in the specimen question paper for GCSE English provided as **Appendix B**, and the new style of answer book is exemplified in **Appendix C**, where a front cover and answer page are provided for information.

Components / units that will work with the new, simplified, numbering system and new style answer book in June 2010 are confirmed in **Appendix D**. Specimen papers, based on the June 2009 examinations, are being developed for all components / units given in **Appendix D**, and will be available for download from the relevant AQA subject web pages **from the middle of January 2010**. This will enable you to see changes in action and to share them with candidates in preparation for examinations in June 2010. To access these materials, click on the 'Key materials' tab and select 'Question Papers and Mark Schemes' (for AS) / 'Specimen Question Papers and Mark Schemes' (for GCSE and A2).

A small number of legacy GCSE question papers, in their last year of operation, will be exempt from changes to question numbering and changes to the style of answer book used. The components / units with exemptions are confirmed in **Appendix E**.

A few subjects that currently use separate question papers and separate answer books will become combined question paper answer books in June 2010; these are confirmed in **Appendix F**.

Whilst we are making improvements to the style of our question papers, centres are reassured that the questions themselves will **not** change as a result of AQA using new technology. They will test the same skills, knowledge and understanding.

The future

Components / units which are already using combined question paper answer books will not, in the vast majority of cases, change format. In general, they are already marked on screen, and already enjoy the benefits outlined previously. A small number of our papers are unsuitable for marking using technology and they will, therefore, continue to be marked by our examiners in the traditional manner. Components / units that will experience no changes to their format in June 2010 are confirmed in **Appendix G**.

By 2012, we will be marking almost all examination components / units on screen, meaning that around seven million scripts will be marked by examiners using technology. This move will help us to meet the call to modernise examinations.

Next steps

We need you to explain the changes outlined in this booklet to your:

- candidates
- Examinations Officers
- Examination Invigilators.

These stakeholders must be aware of the changes to our assessment materials so that if any queries do arise in advance of the examination, advice can be given. Subject teams will be pleased to offer further advice on the changes outlined.

Thank you for supporting these changes.

Frequently Asked Questions and Answers:

Information for teachers and candidates working with the new question numbering system and the new long answer book

Which components / units will be working with the new question numbering system and new long answer book in June 2010?

The components / units that will work with the new question numbering system and new long answer book in June 2010 are confirmed in **Appendix D**.

How can I better understand the changes being made?

Specimen papers, based on the June 2009 examinations, are being developed for all components / units given in **Appendix D**. They will be available for download from the relevant AQA subject web pages **from the middle of January 2010**. This will enable you to see changes in action and to share them with candidates taking examinations in June 2010. To access these materials, click on the 'Key materials' tab and select 'Question Papers and Mark Schemes'

(for AS) / 'Specimen Question Papers and Mark Schemes' (for GCSE and A2).

Which components / units will *not* be working with the new question numbering system and new long answer book in June 2010?

Some components / units will move to work with a combined question paper answer book for the first time in June 2010, and will not, therefore, be affected by the changes to question numbering. These components / units are confirmed in **Appendix F**.

Some components / units will continue to work with their current format of a combined question paper answer book. For these components / units, there will be **no changes** to the question numbering system in June 2010. These components / units confirmed in **Appendix G**.

How can I better understand the changes being made to those components / units that will move to work with a combined question paper answer book and which are identified in Appendix F?

Specimen papers, based on the June 2009 examinations, are being developed for all components / units given in **Appendix F**, and will be available for download from the relevant AQA subject web pages **from the middle of January 2010**. This will enable you to see changes in action and to share them with candidates for examinations in June 2010. To access these materials, click on the 'Key materials' tab and select 'Question Papers and Mark Schemes'.

What form will the new question numbering system take?

The traditional numbering system has been replaced by a two-digit system. Questions will start at 01 and run consecutively throughout the question paper. The table below illustrates how the new question numbering system will work.

Traditional numbering system	New long answer numbering system
Question / Topic / Theme 1	Question / Topic / Theme 1
1(a)	01
1(b)	02
Question / Topic / Theme 2	Question / Topic / Theme 2
2(a)	03
2(b)	04
2(c)(i)	05
2(c)(ii)	06
Question / Topic / Theme 3	Question / Topic / Theme 3
3(a)	07
3(b)	08
etc.	etc.

Why move to this two-digit numbering system?

The simplified two-digit numbering system, which is to be adopted in our examinations using separate question papers and answer books, reflects advice received from external organisations and expert bodies such as:

- the British Association for Teachers of the Deaf
- Royal National Institute of Blind People
- the Plain English Campaign.

AQA draws on advice given from a wide range of sources to ensure that our examination materials are accessible to, and support, the full range of candidates. This move away from the current sophisticated numbering system also meets the call to modernise examinations so that they support candidates' 'real life' experiences of completing, for example, application forms for driving licences, jobs and mortgages, where similar numbering systems are used.

What will the new AQA long answer books look like?

The new AQA long answer books are similar to those used in subjects with traditional essay-based questions, so the format will be familiar to most candidates. See **Appendix C** for an example of the new format long answer book. NB The instructions on the front cover of the new AQA long answer books, and the layout of the answer pages, is standard across answer books with 8, 12 and 16 pages.

What are the benefits for candidates of using this new long answer book?

The new long answer book offers candidates greater flexibility in the examination. Candidates:

- can answer questions in any order
- are able to add further material to an answer or to review / rework what has been produced with greater ease, thus avoiding the potential 'loss' of information through confused additions to the original answer
- are supported to produce answers that are appropriate to the marks allocated but which are not 'constrained' by the number of lines allocated to an answer. So, for example, the size of a candidate's handwriting will not be an issue and should not result in a large number of additional pages being used in the examination.

You say that the new long answer book will support candidates who wish to return to an answer later in the examination. What should a candidate do in such circumstances?

Candidates should leave two lines between each of their answers. If candidates wish to add more material to an answer, they should not try to squeeze it into these lines, extend it into the margin of the answer book, or attach numerous additional sheets to their answer book. Candidates should:

- go to the end of the last response that they have written in the answer book
- leave at least two lines
- write again the number of the question they wish to continue to answer
- write the additional material.

What if a candidate runs out of space in their answer book?

Each candidate will be given one answer book at the start of the examination (see **Appendix D** for confirmation of the size of the answer book for your component / unit). If candidates run out of space, additional sheets will not be issued, instead the Invigilator will give candidates a *supplementary* (four-page) answer book in which to continue their responses. Candidates must complete the information required on the front of their *supplementary* answer book.

What if, under the stress of examination conditions, candidates make a mistake when working with this new question numbering system and new long answer book?

We have taken great care to adopt a very simple numbering system and to design long answer books that are easy to use. However, candidates will not be penalised for completing the new long answer book incorrectly. All responses will be seen by an examiner, even if it is not possible to scan a candidate's script and / or identify immediately, because of issues surrounding legibility, question(s) answered. It would be most helpful, however, if candidates try their best to follow the guidance given here and on the front of the question papers and long answer books.

NB Access arrangements will continue to apply for candidates with special needs. Those who have permission to use a word processor should continue to do so.

What advice can AQA offer in terms of good examination practice, both from previous examinations and, more specifically, from the pilots that used the new question numbering system and new long answer book?

Good examination practice is confirmed in AQA's Reports on the Examination. These Reports are produced every year in support of each component / unit and can be downloaded from e-AQA immediately following the issue of results. Reports identify both good practice and points for improvement in future examination sessions.

The following guidelines are relevant to all candidates' preparation, regardless of subject, level or examination session.

- 1. Prepare thoroughly for the examination.** This applies not only to the material for study but also to the materials to be used during the examination. Candidates must write in black ink or black ball point pen in all AQA examinations. Blue pens are not acceptable.
- 2. Take time to consider each question** and where there are optional questions, read through each one before choosing which to answer.
- 3. Take account of the number of marks allocated to each question and write answers of an appropriate length.** Candidates may penalise themselves for writing material that is not relevant to the question set, or which is of a length that is not commensurate to the number of marks allocated to the question. Candidates should avoid wasting valuable time by rewriting each question at the beginning of their answer – this is not necessary, even when separate answer books are used.
- 4. Structure answers** by making an answer plan, where appropriate.
- 5. Look back at the question set in order to ensure that it has been answered directly.** Examiners cannot award marks for knowledge and understanding of a topic if the specific question set has not been addressed. Candidates can write good answers but fail to achieve marks because they have answered a pre-prepared question and not the question on the examination paper.

6. Ensure that handwriting is legible. Although candidates won't be penalised for poor handwriting, they might penalise themselves if examiners cannot read what is written. If candidates fail to write a question number clearly, the examination process can be affected, with delays in marking the most likely outcome. Therefore, candidates should be

encouraged to write the two-digit question number carefully, and exactly as shown on the question paper, at the start of each answer. The following examples illustrate some of the difficulties that examiners can experience in trying to decipher handwriting that is not clear.

1

Is it a 1 or 2?

3

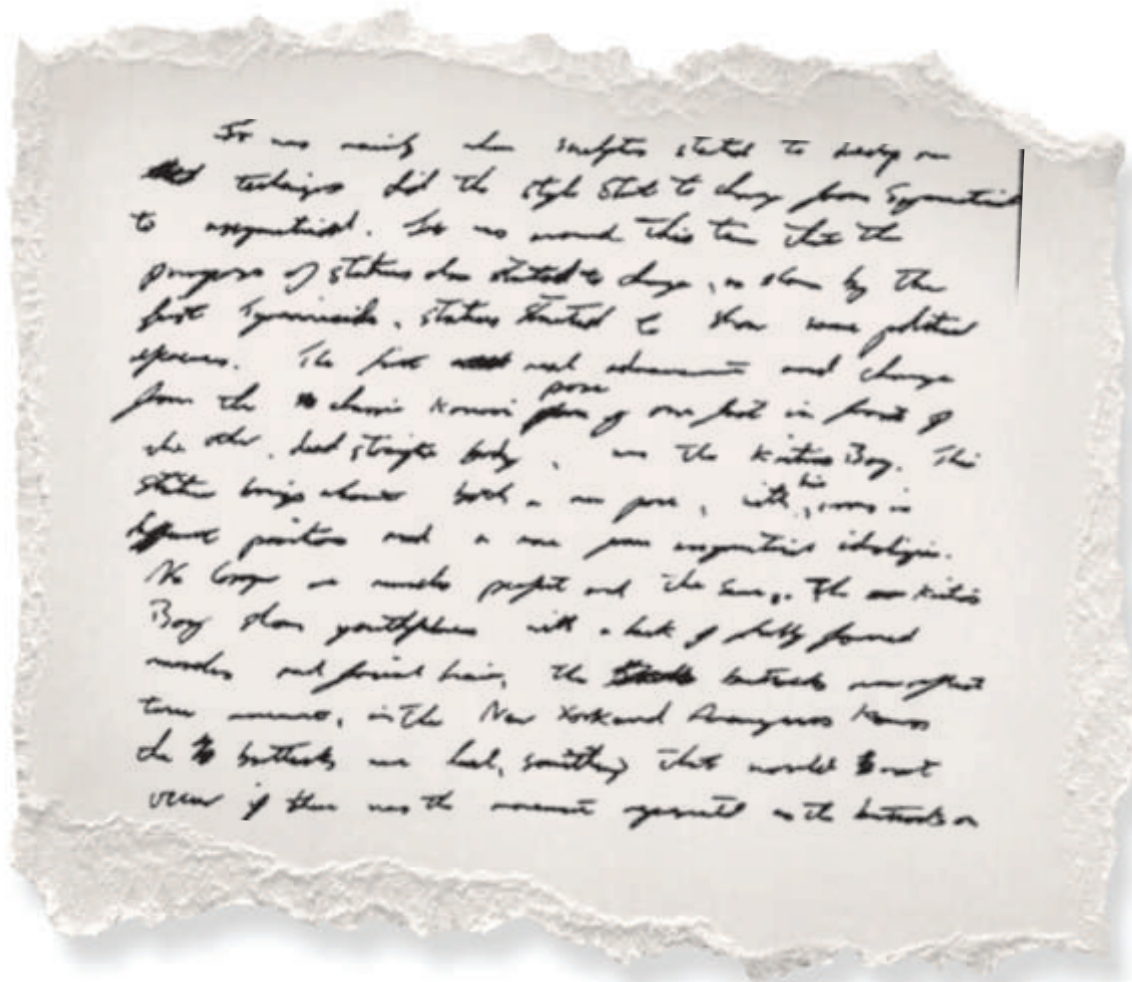

Is it a 3 or 8?

6

Is it a 6 or 8?

5

Is it a 5 or 6?

Legibility is an issue here – it isn't clear which words have been crossed out.

Appendix A

What is Enhanced Results Analysis (ERA)?

ERA is a free online service. As our technology enables us to collect question (item) mark data for candidates, ERA means we can share this data with teachers. The system provides:

- mark and grade data for candidates
- the tools to analyse the data, e.g. relative to your results last year or against national results
- for GCE Computing and GCSE English, Maths, ICT and Science, additional skills and topic analysis which summarises the question data. This gives

teachers information about how their candidates have performed in different assessment objectives, skills or topic areas within the paper.

The teachers who piloted Enhanced Results Analysis said how helpful it was to them in preparing candidates for future examinations. You too will be able to analyse individual questions to identify strengths and weaknesses in candidates' performance. This will help you in the revision for re-sits and in preparing teaching plans for the following year so that you can see improved results in the classroom.

How do you register to have access to ERA?

Step 1 Complete the online form at aqa.org.uk/era

Step 2 You will be sent log in details by your Examinations Office

Step 3 Log in by going to aqa.org.uk/era or type <http://extranet.aqa.org.uk> in your address bar. Now you can start analysing results.

What can enhanced results analysis show you?

There are three ways you can look at the examination results for your centres:

1. Students' results

Allows you to look at the performance of an individual candidate in your centre in all of the subjects they have taken with us.

2. Marks analysis

Allows you to identify areas of your subject where your candidates are performing well and areas where performance could be improved.

3. Grades overview

Allows you to see your school's or college's grades quickly and how these compare to previous years, to the average for similar schools / colleges and to the AQA national average.

Easy four-step process on analysing results

Step 1

Log in by going to aqa.org.uk/era or type <http://extranet.aqa.org.uk> into your address bar

Step 2

Select your search criteria from the drop down boxes, eg
A Level or GCSE
Subject, eg Religious Studies
Date of examination
Subject group

Step 3

Add in additional information, eg candidate's name

Step 4

Click the search button

Appendix B

Example of the new question numbering system: Specimen question paper for GCSE English

SPECIMEN: NOT FOR USE IN ANY EXAMINATION

General Certificate of Secondary Education
Specimen Paper for November 2009

**English
(Specification A)**

3702/1H

H

Paper 1 Higher Tier

For this paper you must have:

- a 12-page answer book
- Items 1 and 2 which are provided as loose inserts inside this question paper.

Time allowed

- 1 hour 45 minutes

Instructions

- Use black ink or black ball-point pen.
- Write the information required on the front of your answer book. The **Examining Body** for this paper is AQA. The **Paper Reference** is 3702/1H.
- Answer **all** the questions in Section A and **one** question from Section B.
- Write your answers in the answer book provided.
- Do all rough work in your answer book. Cross through any work you do not want to be marked.
- You must **not** use a dictionary.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 54.
- You are reminded of the need for good English and clear presentation in your answers. All questions should be answered in continuous prose.
- There are two separate inserts inside this question paper. Item 1 is an A4 booklet and Item 2 appears on the back of the insert front cover.

Advice

- You are advised to spend about one hour on Section A and about 45 minutes on Section B.

Section A: Reading

Answer **all** questions in this section.

You are advised to spend about one hour on this section.

Read **Item 1**, the foreword from a leaflet called *Bringing communities together through sport and culture*.

- 0 1** What, in your own words, does the foreword by Tessa Jowell tell the reader about her views about sport and culture? (4 marks)

Now read **Item 2**, the extract from an article called *Sweeping Death Under the Carpet* by Matthew Engel.

- 0 2** How does Matthew Engel use facts and opinions to persuade the reader of his point of view? (6 marks)

Now look at **Items 1** and **2** together.

- 0 3** Compare:
- the purpose of each item
 - the ways language is used.

Look again at **Item 1**.

- 0 4** How effectively are the following features used in **Item 1** *Bringing communities together through sport and culture*:
- layout
 - pictures
 - colour?
- (9 marks)

3

Section B: Writing to Argue, Persuade or Advise

Answer **one** question from this section.

You are advised to spend about 45 minutes on this section.

You may use some of the information from **Section A** if you want to, but you do not have to do so. If you use any of the information, do not simply copy it.

Remember:

- spend 5 minutes planning and sequencing your material
- about two sides of average sized handwriting should be enough
- spend 5 minutes checking:
 - your paragraphing
 - your punctuation
 - your spelling.

EITHER

0 | 5

Write an article in which you **argue** for **or** against the view that people should **not** be encouraged to take part in dangerous sports or activities. *(27 marks)*

OR

0 | 6

Write a letter to the headteacher **persuading** him/her that all students should take part in at least one hour's physical activity every day at school. *(27 marks)*

OR

0 | 7

Write an article **advising** teenagers on how to make the difficult decisions that face people during their teenage years. *(27 marks)*

OR

0 | 8

Friends of yours are unsure about whether to take a holiday abroad. Write a letter:

- **persuading** them that this country would be a good idea.
- **advising** them on which country to go to. *(27 marks)*

Write the two digit question number *inside* the boxes next to the first line of your answer.
